

Faculty of Information Technology (FIT) – Ho Chi Minh City University of Science (HCMUS)

CS423 / CSC13003 – Software Testing (AI-augmented · 2026)

AI POLICY · TEMPLATES — 2026 v1.0

AI Use Disclosure Form

Attach to assignments where AI was used in any permitted capacity.

Adapted from Med Kharbach, PhD (2026) — AI Use Policy Templates for Higher Education. CC BY-NC-SA 4.0. This adaptation is prepared for FIT@HCMUS – CS423 / CSC15003 Software Testing course.

1. Course & Student Info

Field	Value
Course:	CS423 / CSC13003 – Software Testing
Assignment ID:	HW#01
Assignment Title:	QA/QC Jobs · 20 Defects · Test a Physical Product
AI Use Category (1–5):	Category 3
Date:	2026-05-29
Student name:	Nguyễn Tấn Phát
Student ID:	23127449

2. Disclosure Questions

1. AI tool(s) used:

List every AI tool used for this assignment (e.g., AI Tool (e.g., ChatGPT, Claude, Gemini), ChatGPT, GitHub Copilot, Cursor, Gemini).

Gemini (Google)

2. Stage(s) of the assignment where AI was used:

Tick all that apply: ☐ brainstorming ☐ outlining ☐ drafting ☐ feedback ☐ revision ☐ coding ☐ data analysis ☐ visual design ☐ other (specify).

☒ brainstorming, ☒ outlining, ☒ drafting.

3. Main prompts or tasks given to the AI:

Paste the 2–3 most impactful prompts verbatim. For the full transcript, attach Appendix A (prompt_log.md).

Prompt 3: "Generate a dataset of 20 highly publicized software defects that occurred strictly between 2022 and 2026. Exactly 5 of these defects MUST be related to AI/LLM systems (e.g., hallucination, prompt injection, data poisoning, algorithmic bias). The other 15 defects should be standard software/IT failures (e.g., system crashes, cloud outages, security breaches)..."

Prompt 4: "Generate exactly 12 standard functional test cases for this specific physical box fan. Focus on standard usability, basic functionality... DO NOT generate extreme edge cases..."

4. Specific parts of the work AI contributed to:

Be specific. Example: 'AI generated TC01–TC15 in Section 3.2; I rewrote TC04 and TC11; AI did NOT contribute to Sections 1, 2, 4, or the AI Critique.'

Gemini drafted the initial 20 software defects table (Requirement 2), generated the 12 baseline test cases for the Lifan fan (Requirement 3), and output the initial Mermaid code for the ISTQB mindmap. I completely rewrote the hallucinated URLs and the Chevy Tahoe solution, manually designed edge cases TC-13 to TC-15, and corrected all academic errors in the mindmap. AI did NOT contribute to the physical test execution videos or the AI Critique.

5. How I reviewed, revised, or verified the AI output:

Describe your verification method (ran the test, checked the spec, asked the TA, looked up RFC, cross-checked with the ISTQB syllabus, etc.).

I manually clicked all AI-generated URLs to check for 404 errors. I cross-referenced the Chevrolet Tahoe incident with credible news sources to expose the technical hallucination. I verified the mindmap's accuracy directly against the ISTQB Foundation Level Syllabus. Finally, I physically executed the test cases on the real device to validate their logic.

6. Citation (if required by course style guide):

Software Testing uses the IEEE style. Example: Anthropic. (2026). AI Tool (e.g., ChatGPT, Claude, Gemini) [Large language model]. <https://claude.ai>

Google. (2026). Gemini [LLM]. <https://gemini.google.com>

3. Statement of Honesty

By signing below, I confirm that the disclosure above is accurate and complete. I understand that undisclosed or false disclosure of AI use is treated as academic misconduct and may result in a 0 grade for the assignment and disciplinary referral.
